The style of the page is correct, and the colors used are appropriate, although changes may be made in future updates. The only observation the client made is that we need to add a city field.

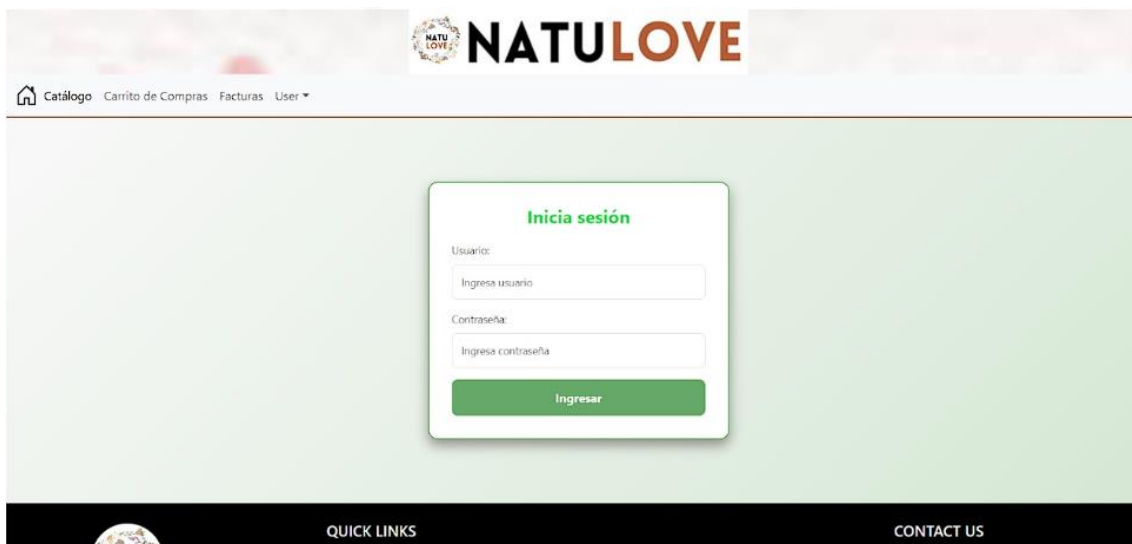

Main Page

The main page is simple, so there is no need to put much effort into navigating it. The client expressed that this is appropriate to ensure easy navigation for her users. There were no significant comments about this page.

Login

The login page is correct, and there is no need for major changes. The only observation from the client was to adjust the page with the business colors (pink, brown, green) was the only observation from the client.

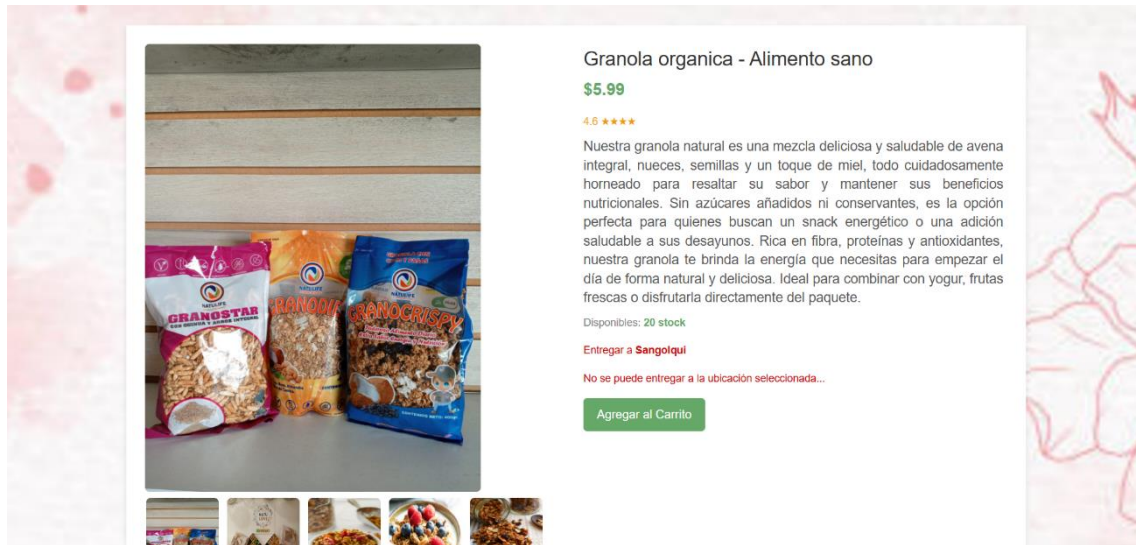

Shopping Cart

The design of the page is not very attractive, and the colors are too striking. The client asked us to increase the quantity displayed for each product in the shopping cart and also to change the style to make it more understandable.

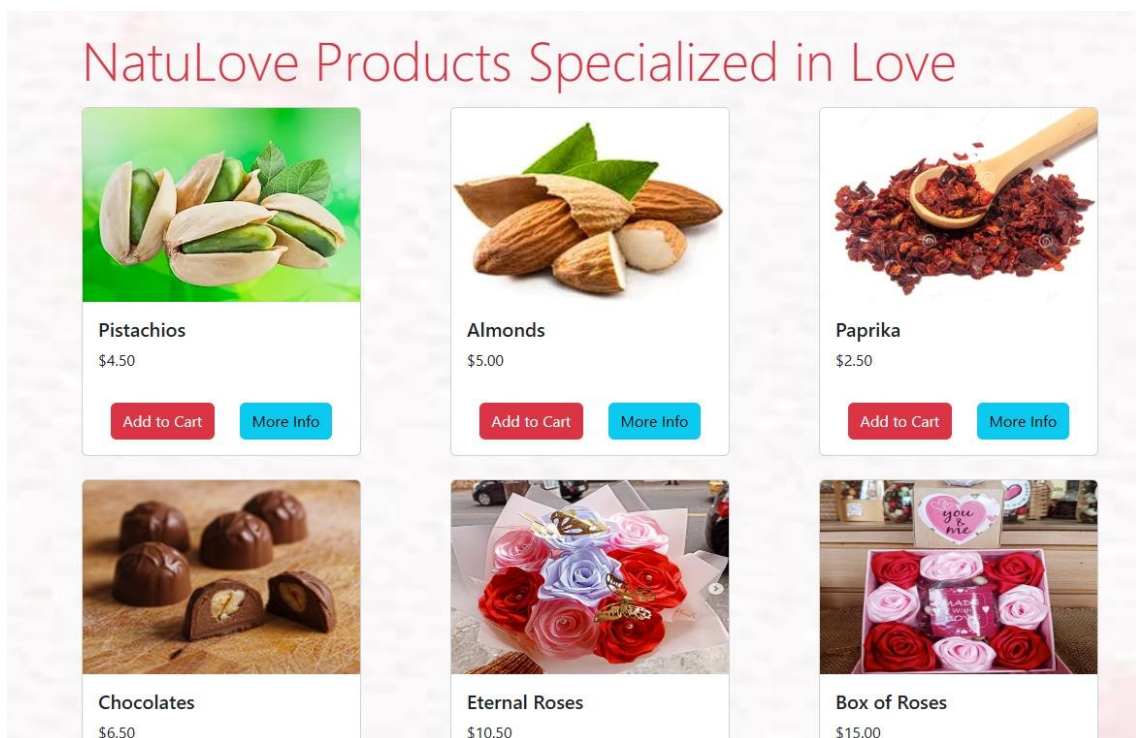

Products page

The appearance of the screen is eye-catching and includes everything necessary for the customer to view the essential product information before making a purchase. On the other hand, the comments do not help improve our products. However, there are some visual errors in the images that need to be fixed.

Catalog

This page does not need any modifications; it has an attractive design, the colors are appropriate, and it contains everything necessary to be understandable and easy to navigate. The client provided no feedback regarding this page.

Billing page

The screenshot shows a web form titled "Billing Information" with the following fields and a "Pay" button:

- Full Name:** John Doe
- Email:** name@example.com
- Address:** 123 Main St
- City:** Quito
- State:** Pichincha
- ZIP Code:** 170902
- Country:** Ecuador
- Payment Method:** Select a method
- Pay:** (button)

On this page, the client commented that the payment form includes all the necessary information. However, the "Pay" button needs changes to make it more visually appealing and improve the design of the page.
